Subject: Fw: Solar Project at North Area Meals on Wheels

Hi Mike,

I just wanted to reach out to see if there was any progress or if there were any concerns regarding this request. Our planning board meeting is on Thursday, and I just wanted to see if there was any chance of getting an approval by then or if we need to modify our timeline.

Any information you could provide would be greatly appreciated.

Thank you,
Mark French

Subject: Solar Project at North Area Meals on Wheels

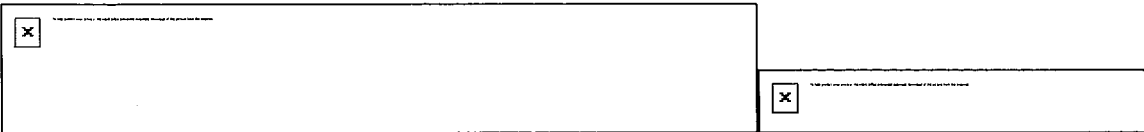

Dear DEC representatives:

I am reaching out on behalf of Next Generation Solar regarding the solar project we are building at North Area Meals on Wheels in North Syracuse. On May 12th there was a meeting at the site with representation from the DEC, North Area Meals on Wheels, and Next Generation Solar to determine the wetlands and buffer zone for the property. Based on this meeting a delineation report was created for the expansion project for the Meals on Wheels building.

Based on that report it appeared that the location of the solar array would be well beyond the buffer zone and there would not be any environmental concerns or need for DEC documentation. However, we have now been asked by the Village of North Syracuse to provide a letter from the DEC stating this to be the case so that they can issue final approval.

I have attached a copy of our plan set, as well as the delineation report described above. Could you please verify that the proposed location of the array is in fact outside of the wetland buffer zone. If for some reason it is not, or you need additional information, please let me know and I will provide what is needed.

Thank you,
Mark French
